## External Gear Units

Rexroth external gear units are classics in the hydraulics world, encompassing hydraulic pumps and motors, individual pumps, multiple pumps, and a new addition to traditional electrohydraulics: low-noise SILENCE units. Available in 7 different product series, these hydraulic units open up a nearly unlimited range of potential applications including heavy-duty construction – and, like all Rexroth hydraulics, deliver efficient power and dependable performance.

# External Gear Units

## External Gear Pumps, Standard

Rexroth standard external gear pumps are designed and built to give good performance in the toughest hydraulic pump applications, with power and high performance.

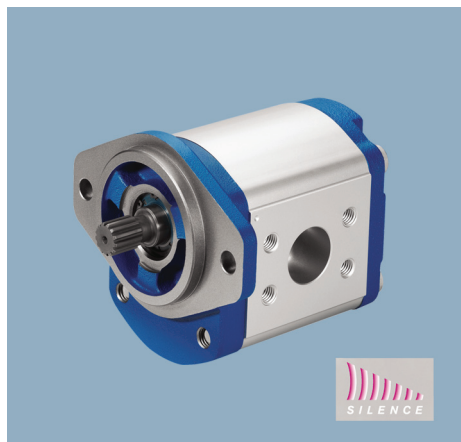

Four product series offer a variety of pump sizes and configurations for almost any applications.
