### **Airline Hydraulics Corporation Forms Strategic Partnership with PV Racking LLC**

BENSALEM, PA – January 23, 2012 – Airline Hydraulics is pleased to announce that it has entered into a strategic partnership with PV Racking LLC of Southampton, PA. PV Racking designs, manufactures and distributes solar racking components used in roof and ground mounted solar systems. This partnership will allow Airline Hydraulics to strengthen their product offering for the renewable energy market with the addition of PV Racking's revolutionary new solar racking system that eliminates the need for clamps and therefore is much easier to install, more secure and superior in appearance. Airline Hydraulics will provide PV Racking with enhanced sales, marketing and logistical support.

"We are excited to enter into this partnership with PV Racking, as their innovative design for solar racking systems that can be installed with unsurpassed ease complements our engineered-solutions approach to meeting our customers' needs," commented Joseph A. Miceli, Chief Executive Officer of Airline Hydraulics. "We are confident that the unique, patent-pending slide-in-place solar racking system that is exclusive to PV Racking's design will meet the growing market need for a fast and easy, yet secure and stable, system for the installation of solar panels." Peter Vari, PV Racking's VP of Engineering, added, "PV Racking is pleased to expand its distribution network with Airline Hydraulics. We are confident this alliance will have a significant impact on our marketing coverage in 2012."

Headquartered in Bensalem, Pennsylvania, just outside of Philadelphia, Airline Hydraulics Corporation is a leading regional distributor of fluid power and automation products with capabilities including stocking inventory, engineering design, manufacturing, assembly, service, repair, and installation. Airline represents Bosch Rexroth, SMC, HYDAC, ABB, Omron, and other major fluid power and automation product lines and has been in business for over 60 years, with seven branch offices and a number of sales offices located throughout the Mid-Atlantic and New England states. As an ISO 9001:2008 certified company, Airline is committed to consistently provide customers with quality products and services. The Airline team is ready to deliver high-performance components and custom-engineered, technology solutions that are innovative and cost effective, to meet customers' fluid power, automation, electrical control, structural system and safety requirements.
