

Automated Pump Tester

DISTRIBUTED COMPONENTS:

- Operator interface
- PLC
- Servo motors
- Pneumatics
- Hydraulics
- Structural framing

KEY ATTRIBUTES:

- Designed to achieve very low flow measurements
- Wonderware front end with data acquisition
- PLC machine control with operator interface
- Brushless servo motor for excellent speed regulation and repeatability +/-0.01%
- Closed-loop pressure control to provide accurate testing of pump assemblies
- Customized hydraulics
