TRAINING AT AIRLINE

Airline Hydraulics is the region's leading distributor of fluid power and automation products, including hydraulic and pneumatic components, industrial sensors, motion control and safety products. Airline also integrates these components into complete packages for original equipment manufacturers and MRO customers. Our knowledgeable staff is highly trained to specialize in a specific technology. This in-depth training, coupled with years of experience and outstanding customer service has lead to Airline's extraordinary growth over the past six decades.

When you receive training from Airline, be assured that you are receiving training from the best. Our instructors are experts in their fields and employ proven training methods to ensure that those who attend our classes obtain the highest caliber of training available in the industry.

Airline offers regularly scheduled classes in hydraulics, pneumatics and automation. Machine safety seminars are also conducted several times per year. Arrangements can be made to hold a class at your place of business. These specially designed classes can be customized to your equipment and arranged to meet your schedule.

At Airline, we believe there's no greater asset to a company than a properly trained employee. We invite you to let us provide the training your company needs to fully understand today's industrial equipment. If you have any questions or would like to speak to one of our training representatives, please call us at (215) 638-4700. We look forward to hearing from you!

AIRLINE'S TRAINING AND ADMINISTRATIVE STAFF

Richard Sharp, *Project Engineer/Training Manager*

Ed Brogan, *Product Specialist/Automation Training*

Joe Brogan, *Customer Service Manager*

Hollie Garrison, *Training Coordinator*

Register online at www.airlinehyd.com.

AUTOMATION TRAINING

Airline's automation training classes are designed to provide students with the knowledge and experience required to meet the demands of today's technological workplace. By empowering employees with the crucial knowledge necessary to maintain competitiveness in the marketplace, the return on investment is immediate. Our instructors have over 20 years of factory automation experience, making the learning experience tangible through application examples and hands-on training. Our classes are normally taught at Airline's facilities, but arrangements can be made with our training group to have standard or specially designed courses held at your facility. Individual course descriptions follow. Regularly scheduled classes include *Basic PLC Programming and Troubleshooting (E2)* and *Advanced PLC Programming (E4)*. In addition, Airline offers the following classes upon request: *Sensor Workshop (E1)*, *Introduction to Operator Interface Programming (E5)*, *Stepper and Servo Motor Basics (E6)*, *DeviceNet Training (E7)*, *Industrial Networking (E8)* and *Oriental Motor Indexer Training (E11)*.

BASIC PLC PROGRAMMING AND TROUBLESHOOTING (E2)

Designed for the beginner with no previous experience, this class will cover basic programming steps, advanced functions and the student will gain insight into the cause and effect of machines being controlled by PLCs. Whether you wish to replace hard wired relay and timer systems, or you require shift registers, math functions and data manipulation, you will benefit from this course. You will get hands-on programming experience with the Omron CP1 programmable controller...a high powered PLC in a small package. Students will program utilizing Omron CX Programmer software. The second day, which is optional, will be an application workshop providing the student with an opportunity to work on real-world PLC programming problems. Bring a laptop computer, if possible.

Major topics include:

- ◆ Basic functions
- ◆ Introduction to hardware
- ◆ Number systems
- ◆ Hardware configuration
- ◆ Special functions
- ◆ Basic logic
- ◆ Advanced functions

- ◆ Input/output interfacing
- ◆ NPN vs. PNP
- ◆ Troubleshooting techniques
- ◆ Program modification and monitoring

1 or 2 Day / Price: \$300 per person, optional 2nd day add \$250

CLASS SCHEDULE:

York: Mar. 13-14, 2012

Pittsburgh: Apr. 17-18, 2012

**N. Billerica: Apr. 24-25, 2012
Sept. 25-26, 2012**

**Rochester: May 15-16, 2012
Oct. 16-17, 2012**

**Bensalem: Jun. 12-13, 2012
Oct. 2-3, 2012**

All classes run from 8:30 am – 5:00 pm. Lunch is provided.

ADVANCED PLC PROGRAMMING (E4) -----

Get hands-on training using the powerful Omron CP1H High End Programmable Logic Controller. This two day course will familiarize you with the configuration software and applications of the Omron CP1H. All attendees will receive a workbook, an applications lab manual and an operation manual. Upon completion of this course, you will understand local and remote input/output, memory areas, configuring, special functions and programming techniques.

Major topics include:

- ◆ Logic and editing
- ◆ Timers, counters and temporary relays
- ◆ Interlocks, jumps and differentiation
- ◆ Shift register, binary arithmetic and BCD
- ◆ Move, add, subtract and compare
- ◆ High speed counter applications
- ◆ Communications, interrupts, CAM positioning applications

2 Days / Price: \$550 per person

CLASS SCHEDULE:

York: Mar. 20-21, 2012

**Bensalem: Jun. 19-20, 2012
Oct. 9-10, 2012**

All classes run from 8:30 am – 5:00 pm. Lunch is provided.

Airline also offers the following unscheduled classes upon request. The time and location for these classes will be arranged on an as-needed basis. If you would like to register, fill out and return the registration form found at the end of this catalog. Indicate “unscheduled” for the class time and location, and include preferred days and location (one of our facilities or yours) on the form. You will be notified of the date and location of the class once we have received four or more registrations. (NOTE: A minimum class size of 4 students is required for any scheduled or unscheduled class to be held.)

SENSOR WORKSHOP (E1) -----

The Sensor Workshop is a practical one day hands-on training for applications and wiring of the latest Omron sensors. At the completion of this course, you will learn the various parameters used for sensor applications, the proper selection of sensors and considerations for special applications.

Major topics include:

- ◆ Capacitive proximity switch
- ◆ Inductive proximity switch
- ◆ Photo sensors
- ◆ Fiber optics

1 Day / Price: \$300 per person – Scheduled upon request.

Contact Ed Brogan (ebrogan@airlinehyd.com) for more information.

INTRODUCTION TO OPERATOR INTERFACE PROGRAMING (E5) -----

Utilization of operator interfaces with PLCs is rapidly becoming the primary method of interacting with machines. This course is intended as an introduction to the basics of programming operator interface displays as well as their interaction with PLCs. This is a hands-on course utilizing Omron's NT11S as well as CX Programmer software for the CP1 PLC.

Major topics include:

- ◆ Identification of operation interface function
- ◆ Programming basic screen elements
- ◆ Design of screen displays
- ◆ Communications with PLCs
- ◆ Implementation of an interactive program

1 Day / Price: \$300 per person – Scheduled upon request.

Contact Ed Brogan (ebrogan@airlinehyd.com) for more information.

STEPPER AND SERVO MOTOR BASICS (E6)

This course will cover motor and drive basics for both stepper and servo systems as well as describe the differences between uni-polar and bipolar drives, hybrid, variable reluctance and permanent magnet stepper motors. Differences between 2-phase vs. 5-phase step motors, DC brushless, servo motor and drive technology will also be covered.

Major topics include:

- ◆ Motor/amplifier technology
- ◆ Comparison of stepper and brush motor
- ◆ Motion profiles
- ◆ Sizing
- ◆ Amplifier I/O
- ◆ Amplifier parameters
- ◆ Tuning

1 Day / Price: \$300 per person – Scheduled upon request.

Contact Ed Brogan (ebrogan@airlinehyd.com) for more information.

DEVICENET TRAINING (E7)

This hands-on course is intended as an introduction to DeviceNet networks. An overview of DeviceNet systems and architectures will lead into extensive hands-on wiring and implementation. At the conclusion of this course, you will have a first-hand understanding of the simplicity and power of a DeviceNet network.

Major topics include:

- ◆ DeviceNet introduction
- ◆ Hands-on wiring and implementation

2 Days / Price: \$550 per person – Scheduled upon request.

Contact Ed Brogan (ebrogan@airlinehyd.com) for more information.

INDUSTRIAL NETWORKING (E8)

This course is intended to provide an introduction to various industrial networking options available today. The course will start with a classroom lecture on the most common networks including Ethernet, DeviceNet, ProfiBus and AS Interface. An explanation of the features and benefits for each network will follow. The last half of the course will be spent in a hands-on lab environment working with each network first hand. At the conclusion of this course, you will have a strong understanding of where and why to use each network.

Major topics include:

- ◆ Ethernet
- ◆ DeviceNet
- ◆ ProfiBus
- ◆ AS Interface

2 Days / Price: \$550 per person – Scheduled upon request.

Contact Ed Brogan (ebrogan@airlinehyd.com) for more information.

ORIENTAL MOTOR INDEXER TRAINING (E11) -----

This course covers the hands-on setup and programming of Oriental Motor's single axis motion controller. Controller utilizes the basic language to simplify programming, but provides powerful instruction set to solve most motion applications. Class will cover hardware and software overview, and hands-on programming examples of homing, jogging and mark registration.

Major topics include:

- ◆ Hardware and software overview
- ◆ Hands-on programming examples

1 Day / Price: \$300 per person – Scheduled upon request.

Contact Ed Brogan (ebrogan@airlinehyd.com) for more information.

PNEUMATIC TRAINING

INTRODUCTION TO PNEUMATICS (P1)

This course is designed to give the student knowledge of a basic pneumatic system, starting with the air compressor, dryer, filter-regulator-lubricator and ending with the actuator. The course will stress the importance of good filtration and lubrication before introducing the air to the valves that make up the control system. The second day of class includes hands-on training using a pneumatic training panel. Perfect as a review for you, your employees, or for new employees looking for an understanding of pneumatic systems.

Major topics include:

- ◆ Pneumatic principles
- ◆ Air preparation
- ◆ Directional control valves
- ◆ Actuators
- ◆ Pneumatic schematics
- ◆ Air logic
- ◆ Circuits
- ◆ System maintenance

Our classes are normally taught at Airline's facilities, but arrangements can be made with our training group to have standard or specially designed courses held at your facility.

2 Days / Price: \$250 per person

CLASS SCHEDULE:

Bensalem: Feb. 22-23, 2012
Oct. 24-25, 2012

York: Apr. 17-18, 2012
Oct. 3-4, 2012

All classes run from 8:30 am – 5:00 pm. Lunch is provided.

Contact Dick Sharp (rsharp@airlinehyd.com) for more information.

HYDRAULIC TRAINING

Airline's hydraulic training classes are a great benefit to assembly personnel, engineers, purchasing agents, technicians, maintenance personnel and new employees in the industrial and mobile fluid power industries. These courses will allow the student to be more productive in their jobs and more informed about the equipment they repair, produce or operate. Our instructors have worked in the fluid power industry for many years. They have at their disposal excellent training materials and study references for the students to use, as well as visual aids, component cutaways and hands-on systems. Our classes are normally taught at Airline's facilities, but arrangements can be made with our training group to have standard or specially designed courses held at your facility. Individual course descriptions follow. Refer to the course schedule at the end of this section for individual class times, locations and pricing.

INDUSTRIAL HYDRAULIC TRAINING (H1)

The Basic Industrial Hydraulic Course deals with the physical principles of force, pressure, and fluid flows. The relationship of these principles to the components and systems that power today's industrial machinery is introduced. The primary discussions will center on component function, symbology and basic circuitry of a hydraulic system. The manual used is one of the clearest, best written books in the industry. Instruction is supplemented with component cutaways and the second day of class includes hands-on training using a hydraulic trainer unit. You will learn the benefits of proactive maintenance, system safety and basic troubleshooting of hydraulic systems.

Major topics include:

- ◆ Hydraulic principles
- ◆ Actuators - cylinders, motors, rotary actuators
- ◆ Valves - directional, flow, pressure control
- ◆ Pumps
- ◆ Fluid selection

- ◆ Reservoirs and piping
- ◆ Filtration
- ◆ Accessories

2 Days / Price: \$330 per person plus \$95 for book

CLASS SCHEDULE:

**Bensalem: Mar. 14-15, 2012
Sept. 12-13, 2012**

**York: May 2-3, 2012
Nov. 14-15, 2012**

All classes run from 8:30 am – 5:00 pm. Lunch is provided.

HYDRAULIC TROUBLESHOOTING (H2) -----

The Hydraulic Troubleshooting Course is designed to train people working with hydraulic systems how to diagnose problems. This course will also delve into the proper installation of components and fluid conductors. Emphasis on preventive maintenance will show how to reduce the amount of troubleshooting required. We will work with schematics and cutaways of components. You will learn the proper steps to quickly analyze and pinpoint where a problem is centered and how to fix it.

Major topics include:

- ◆ System schematics
- ◆ Installation of components and conductors
- ◆ Fluid analysis
- ◆ Preventative maintenance
- ◆ Troubleshooting - actuators, valves and pumps
- ◆ System safety

Class times and locations will be scheduled on an as-needed basis. To register, fill out and return the registration form found at the end of this catalog. You will be notified of the date and location of the class once we have received four or more registrations. You may also schedule training at your facility. **For more information, call Dick Sharp at (215) 638-4700 ext 2141.**

1 Day / Price: \$200 per person – Scheduled upon request.

HYDRAULIC TRAINING FROM BOSCH REXROTH

As an authorized distributor of Bosch Rexroth products, Airline is proud to include the following Bosch Rexroth hydraulic technical training classes among our course offerings. Regularly scheduled classes in hydraulics technology are offered in Bethlehem, PA, Spokane, WA and Canada. This catalog lists only the classes held at the Bethlehem Area Vocational Technical School in Bethlehem, PA. For information on classes held in Spokane, WA, call 610-694-8407 or e-mail Lois.Maura@boschrexroth-us.com. For information on classes held in Canada, call Bosch Rexroth Canada at (905) 335-5511 or e-mail training@boschrexroth.ca.

Registration for Bethlehem classes can be made by contacting Hollie Garrison at 215-638-4700 ext. 2819, or by completing the registration form found at the end of this booklet.

Registration for Bosch Rexroth hydraulic training classes closes two weeks prior to the start of each course. Refer to registration instructions on page 16 for important details. Prices for all Bosch Rexroth classes include seminar fee, all student materials, text book, daily lunch & refreshments. **Refer to Rexroth's Hydraulics Technical Training Schedule brochure for individual course descriptions and prerequisites.** All courses are conducted in 5-day sessions.

2012 BOSCH REXROTH HYDRAULIC TRAINING SCHEDULE

| Code | Class Name | Tuition | 2012 Dates for Bethlehem, PA Classes |
|-------------|---|---------|--|
| POH | Principles of Hydraulics | \$1,700 | Jan. 23-27; Feb. 13-17; Mar. 12-16; Apr. 16-20; May 14-18; Jun. 11-15; Jul. 16-20; Aug. 13-17; Sept.10-14; Oct. 8-12; Nov. 12-16; Dec.3-7 |
| MHT | Mobile Hydraulic Technology | \$1,700 | Feb. 6-10 |
| MRS | Maintenance, Repair & Setup of Industrial Hydraulics | \$1,700 | Jan. 30 - Feb. 3; Mar. 5-9; Jun. 18-22; Sep. 24-28; Nov.5-9 |
| MRSM | Maintenance, Repair & Setup of Mobile Hydraulics | \$1,700 | Mar. 26-30 |
| FSP | Fundamentals & Servicing of Proportional Valves | \$1,800 | Apr. 23-27; Sept. 15-19 |
| PCO | Pumps & Controls - Open Loop | \$1,800 | May 7-11; Aug. 6-10 |
| PCC | Pumps & Controls - Closed Loop | \$1,800 | Aug. 27-31 |
| DCH | Design Considerations for Industrial Hydraulics | \$1,800 | Jun. 25-29 |
| DCHM | Design Considerations for Mobile Hydraulics | \$1,800 | Oct. 29 - Nov. 2 |
| PSD | Proportional & Servo Circuit Design | \$1,800 | Jul. 30 - Aug. 3 |
| ECH | Electronic Controls for Hydraulic Systems | \$1,800 | Sept. 17-21 |

SAFETY SEMINARS

At Airline, we realize how difficult it is to stay current of industry changes in laws and guidelines. That's why we offer seminars to provide an understanding of safety standards and examine measures that can be taken to assure full compliance.

MACHINE SAFEGUARDING SKILL BUILDER SEMINAR (OM-MACH)-----

Presented by Omron STI.

- ◆ Are your machines guarded to relevant standards?
- ◆ Have all steps been taken to prevent injuries from process equipment?
- ◆ Has a documented machine guarding assessment been performed to verify compliance?

If you answered "no" to any of these questions or even if you're just not sure, your facility will benefit from an Omron STI Machine Safeguarding Skill Builder seminar.

Skill Builders are not a sales pitch - they are one-day training seminars designed to educate your personnel on the requirements and methods of machine and process safeguarding to help them identify, and sometimes correct, machine safeguarding discrepancies. Skill Builder attendees will walk away with a greater understanding of methods for machine safeguarding, and the correct application of guarding devices.

Major topics include:

- ◆ Identifying machine hazards
- ◆ Machine hazard risk assessment
- ◆ Machine guarding techniques and the latest safeguarding technologies
- ◆ Machine guarding requirements as set by regulatory and consensus standards
- ◆ Safety circuit design requirements based on risk level
- ◆ Practical application

1 Day / Price: \$250 per person

SEMINAR SCHEDULE: None scheduled at this time.

The Skill Builder Seminar runs from 8:15 am – 4:30 pm. Lunch is provided.

GENERAL MACHINE SAFETY (SCH-GEN)

Presented by Mike DeRosier, Schmersal Inc.

This seminar covers the general concepts of machine safeguarding and provides an understanding of legal requirements, risk assessment, types of hazards, safety equipment and different levels of circuit design. You will learn how to put it all together for a complete safety solution.

Major topics include:

- ◆ Understanding OSHA and industry consensus
- ◆ Standards
- ◆ Risk assessment principles
- ◆ Hazard types
- ◆ Risk reduction
- ◆ Safeguarding principles
- ◆ Safety equipment – separating vs. non-separating
- ◆ Fixed and movable guards
- ◆ Reaching and guard opening design
- ◆ Application of safety switches
- ◆ Safety monitoring relays and controllers
- ◆ Understanding safety circuit design –
- ◆ Safety categories and performance levels
- ◆ Fault tolerance and exclusions
- ◆ Fluid power safety

1 Day / Price: \$100 per person

SEMINAR SCHEDULE: TBD

Seminars run from 9:00 am – 4:00 pm. Lunch is provided.

ISO 13849-1... ARE YOU READY? (SCH-ISO)

Presented by Mike DeRosier, Schmersal Inc.

ISO13849-1 is a global harmonized standard relating to the risk assessment, design, and performance of safety control systems on machinery. This standard is accepted world-wide as the principle safety control design guideline and it represents a major change in the philosophy of hazard analysis and designing safety-related parts of machine control systems. This informative seminar will prepare you for the transition to ISO 13849-1.

Major topics include:

- ◆ The differences between required performance levels and safety control categories
- ◆ Why this standard was developed and has been accepted globally
- ◆ Specific information about the standard
- ◆ How to use this standard to analyze risk factors and circuit performance
- ◆ How to calculate the performance levels of your existing system and pending designs

1 Day / Price: \$100 per person

SEMINAR SCHEDULE: TBD

Seminar runs from 9:00 am – 4:00 pm. Lunch is provided.

CUSTOM TRAINING

Training instructors at Airline have extensive knowledge in the fields of industrial, mobile and marine hydraulics, pneumatics, motion-control, safety systems and electronics. Specialized training sessions can be customized to meet the specific needs of your company, focusing on your equipment, needs and applications. These customized training sessions can be held at your location or at one of Airline's training facilities.

For more information on customized training for your company, contact:

- ◆ **Dick Sharp** – Hydraulics and Pneumatics Training: (215) 638-4700, ext. 2141;
rsharp@airlinehyd.com
- ◆ **Ed Brogan** – Automation Training: (215) 638-4700, ext. 2118;
ebrogan@airlinehyd.com
- ◆ **John Guckin** – Machine Safeguarding Training: (215) 806-2310 (cell);
jguckin@airlinehyd.com

REGISTRATION PROCEDURES

- ◆ Call our training coordinator, Hollie Garrison at (215) 638-4700, or
- ◆ Duplicate, complete and return the registration form on the following page to Hollie Garrison via:
 - email to training@airlinehyd.com
 - fax to (215) 638-1707
 - mail to: Airline, 3557 Progress Dr., Bensalem, PA 19020
- ◆ Registration can also be completed online at www.airlinehyd.com.

Upon receipt of your registration, you will receive confirmation of your enrollment. If requested, hotel information and directions will be provided at this time.

Registration closes one week prior to the start of each class. Each class requires a minimum of four students. If this number is not reached one week prior to the class date, Airline will notify all who have registered that the class has been cancelled.

REGISTRATION FOR BOSCH REXROTH HYDRAULICS TRAINING

As an authorized distributor for Bosch Rexroth, Airline is proud to include their hydraulic training classes among our course offerings. To register for a Bosch Rexroth hydraulic class, simply fill out and submit the registration form on the following page. **Registrations must be received at least 2 weeks in advance of the class date. Payment in full must accompany the registration. Checks or purchase orders should be made payable to "Airline."** Please note that this payment is non-refundable if registration is cancelled after 2 weeks prior to the start date of the class, however it can be applied to another Bosch Rexroth hydraulic class.

PAYMENT INFORMATION

For scheduled classes: Payment can be made in the form of a check (payable to "Airline") or credit card. Company purchase orders will also be accepted from customers with an open line of credit. Payment must be submitted by one week in advance of the first day of class. Billing will be processed at the time of the class.

Cancellation fee: Please notify us as soon as possible if you must cancel your registration for any class. There is no cancellation fee if we are given at least one week's advance notice of any cancelled registration. If a registrant cancels their registration later than one week in advance of the class starting date, a \$100 fee will be assessed, but this fee may be used toward registration for another class. Registration fees may be transferred to another person at no charge.

For unscheduled classes: For a portion of our course offering, a class date will not be scheduled until we have a minimum number of registrants. In this case, payment is not due until the class date has been set and the registrant has been notified and agrees to attend.

TRAINING REGISTRATION

Register via mail, phone, fax or web!
For registration, payment and inquiries please contact:

Airline Hydraulics - Headquarters

3557 Progress Drive
Bensalem, PA 19020-8505

I would like to register for the following session:

| | |
|--|------------------|
| Session Name | Registrant Name |
| Session Code (i.e. "E3") | Title |
| Session Location* | Company |
| Session Date* | Department |
| Session Fee (<i>Note: All session fees include the \$100 deposit due within 1 week of registration.</i>) | Business Address |
| PAYMENT METHOD: | Address, Line 2 |
| <input type="checkbox"/> Check, payable to Airline, enclosed for \$ _____ | City State Zip |
| <input type="checkbox"/> Invoice Company for \$ _____ | Phone |
| PO # _____ | Fax |
| attn.: _____ | E-mail |
| <input type="checkbox"/> Credit Card | |
| <input type="checkbox"/> Visa <input type="checkbox"/> MasterCard <input type="checkbox"/> Amer. Ex. | |
| Account Number | |
| Expiration Date 3 Digit Security Code | |
| Name on Card | |
| Billing Address (if different than above) | |

*If the training session is unscheduled, please indicate preferred days and location. No deposit is required until you are notified that a class has been scheduled.

NO RISK REGISTRATION!

Register now for the training session of your choice. You have the option of rescheduling or substituting personnel at no additional cost. If you must cancel your registration, do so at least 1 week in advance of your training class and Airline will refund your \$100 registration fee. Cancellations made after this time will result in forfeiture of the registration fee, however it may be applied toward another class. See "Payment Information" on the previous page for details.
