Airline Hydraulics Corporation and Yates Industries Announce New Distribution Partnership

BENSALEM, PA – May 30, 2014 – Airline Hydraulics Corporation (Airline), headquartered in Bensalem, PA, has agreed to become an authorized Yates cylinder distributor. This agreement builds upon the long-standing, strong partnership between Yates and Fluid Power Service Corporation, a company acquired by Airline in October 2012. Fluid Power Service is located in Lancaster, NY and specializes in the repair, design and manufacture of industrial and mobile hydraulic machinery. Both Airline and Fluid Power Service will distribute Yates hydraulic and pneumatic cylinders, welded and mill-type cylinders, and cylinder accessories.

“We are extremely excited to partner with Airline and look forward to working with their dedicated team of qualified sales engineers,” commented Steve M. Cavera, National Sales Manager of North America at Yates. Dave Wenner, Airline’s Fluid Systems Business Unit Manager, added, “Yates cylinders are among the most reliable and cost-effective cylinders available today. Their commitment to quality, along with their ability to meet demanding deadlines and manufacture customized solutions are in alignment with Airline’s core values to satisfy the needs of our customers.”

Yates has been a leading cylinder business provider since 1972. Yates combines over 42 years’ of hands-on experience with knowledge and technology as a cylinder manufacturer and repair facility. Yates recently expanded its state of the art 100,000+ sq. ft. manufacturing facility in St. Clair Shores, MI and in 2007 added their 45,000 sq. ft. Decatur, Alabama facility to allow their customers in the southern United States to get the same quality cylinder products and services with less transit time. As recently as May 2014, Yates expanded their business with another facility that will manufacture a new general line welded cylinder to help keep up with the demand of the cylinder industry.

Airline Hydraulics Corporation has offices located throughout the Northeastern U.S. and is an ISO 9001:2008 certified distributor of hydraulic, lubrication, pneumatic, automation and machine safeguarding products from leading manufacturers including Yates, Bosch Rexroth, HYDAC, SMC, Eaton, Omron and other major fluid power and automation product lines. Airline provides system design, manufacturing, service, installation and repair in addition to the distribution of high-performance products. Founded in 1947, Airline is currently celebrating their 65th year of providing technical solutions to a wide variety of industries.
