## Elements with Plain Outer Wrap for Water Glycol Applications

To respond to our customers who have specifically encountered the ink on the outer wrap of our elements breaking down in two water glycols - Eco Safe 46 and FRG 200D. HYDAC is investigating these fluids and the mechanism of chemical attack on the element outer wrap with the intent of changing the ink used to print the outer wrap to a completely compatible ink to be used in these fluids.

In the mean time, HYDAC has set up the following elements with plain outer wrap to be used in these specific applications where these fluids are used. Please note that the elements set up will have viton seals with a plain outer wrap. The price is the same as a buna seal version and can be used in all applications where buna or viton O-rings are used.

When the ink is changed globally, you will be notified that this issue is resolved in total. Please note that the ink is on the upstream (dirty side) and cannot pass down-stream, but goes into the element media pack. HYDAC customers are not in danger of any loss of protection in any way, however, the concern of dissolving ink is being addressed in a complete manner.

The elements available for Water Glycols are as follows:

Model Code:	HYDAC P/N	List Price
1300 R 003 BN4HC/-V PLAIN WRAP	02092157	\$330.70 LIST PRICE
1300 R 005 BN4HC/-V PLAIN WRAP	02092158	\$330.70 LIST PRICE
1300 R 010 BN4HC/-V PLAIN WRAP	02092159	\$307.00 LIST PRICE
1700 R 003 BN4HC/-V PLAIN WRAP	02092160	\$739.60 LIST PRICE
1700 R 005 BN4HC/-V PLAIN WRAP	02092161	\$739.60 LIST PRICE
1700 R 010 BN4HC/-V PLAIN WRAP	02092162	\$698.40 LIST PRICE
2600 R 003 BN4HC/-V PLAIN WRAP	02092163	\$658.20 LIST PRICE
2600 R 005 BN4HC/-V PLAIN WRAP	02092164	\$658.20 LIST PRICE
2600 R 010 BN4HC/-V PLAIN WRAP	02092165	\$608.80 LIST PRICE

These element will be available with a 4 weeks lead time.
