CUSTOMIZED OFFERINGS

We offer a standard line of barriers AND the unique capability to tailor designs to individual dimensions and applications. From **concept to completion**, we can create a social distancing barriers that meets your safety and budgetary needs.

Concept

We'll listen, collaborate, and examine your dimensions & floor plan to create a concept sketch.

Design

Our design group will generate CAD drawings of your solution and submit them for your review.

Manufacturing

Our team of assemblers will spring into action to build your barrier units in our ISO-9001 certified facilities.

Installation

We'll ship the barriers to your facilities (freight), or travel to your facility to safely install them.

HIGH-QUALITY MATERIALS

You can be confident our barriers are **high-quality**, **stable**, and easy to **clean**.

POLYCARBONATE PLASTIC

Sometimes referred to by its brand names, Lexan or Palsun, it is 250x stronger than glass and 30x stronger than acrylic and other plastics. It offers 89% light transmission, is ecologically sustainable and easy to clean with mild dish soap.

ALUMINUM STRUCTURAL FRAMING

For designs that require frames, we create them with aluminum extrusion as it's strong, aesthetic, eco-friendly, and easy to clean with mild dish soap or commercial cleaners.

LET'S BE SAFETY PARTNERS

We're 100% employee-owned and have been in business for over 65 years. Our large team of engineers, mechanical assemblers and installers allow us to be your valued partner in providing safety solutions.

Contact us to discuss making your restaurant a safe social space.
