

E² 1200 Vac mining service breakers

Product overview

State-of-the-art E² mining service breakers incorporate the rigid specifications and testing procedures developed by a focus group led by engineers from several large coal companies and Eaton design engineers. The performance of these breakers was proven and verified during hundreds of hours of testing.

Industry-leading E² mining breakers are now available in 1200 Vac with IEC certification.

This family of breakers is designed especially for trailing cable application and meets key global mining standards.^①

^① MSHA 30 CFR75.
