Ingersoll Rand
Rotary Screw Air Compressors
5-15 hp (4-11 kW)

Innovation
Reliability
Efficiency
Welcome to Ingersoll Rand’s rotary air solutions, a new standard of performance.

**Achieve highest productivity** and lowest total cost-of-ownership.

**Boost Your Profitability**

Boosting your company’s profits was the main goal that Ingersoll Rand had in mind when designing our revolutionary line of integrated rotary screw air solutions.

So how can a compressed air system help you increase profitability? The answer is really pretty simple: by ensuring that you achieve the highest productivity in your shop while reducing the total costs of ownership to the absolute lowest levels.

Our rotary screw compressors are more than integrated air systems; they are complete air solutions designed to maximize the key drivers of profitability in today’s business:

- Ultimate reliability
- Shop productivity
- Flexibility of operation
- Energy efficiency and savings
Exceptional Value

**Ultimate Reliability**
Maximum Uptime
Ingersoll Rand is so confident in the performance of these compressors, that we offer a choice of extended warranty packages designed to provide you with maximum operating security.

70% Fewer Connections
Smart integration eliminates leaks and pressure drops, ensuring maximum reliability.

**Ultimate Efficiency**
More Air for Your Money
Industry-leading performance delivers more air for less horsepower, saving thousands of dollars per year on energy.

Smart, Energy-efficient Controls
Eliminates wasteful unloaded running by cycling the compressor on/off.

**Ultimate Flexibility**
Compact Footprint
Small footprint frees up valuable floor space and reduces installation costs.

Installation Close to Point-of-use
Whisper-quiet operation allows for installation closer to point-of-use, reducing costs and ensuring a better, safer work environment.

**Ultimate Productivity**
Closely Maintained Pressure
Closely maintained discharge pressure avoids excessive pressure bands and increases downstream tool and equipment life.
Innovation
High-efficiency Integrated Compression Module
- To provide maximum performance, efficiency and ease-of-service, the airend, interconnecting piping and separation system have all been integrated into one simple design. Integration of the compression module eliminates leaks and pressure losses to increase efficiency and performance.
- Service and maintenance are made extremely easy through spin-on oil and separator cartridges.

Real World Advantages

Whisper-quiet Operation
Oversized, high-efficiency motor mount blower. Sound levels as low as 65 dB(A).

Dual-control Operation
Auto start/stop operation with constant speed control for maximum flexibility.

Simple Diagnostics
Visual indication of operating status, hours and fault warnings for ease-of-operation and reduced downtime.

Poly-V Belt Drive
Premium drive system to minimize belt stretching and increase air output.

Advanced Cooling
High-efficiency, oversized combination cooler with roof mount discharge for ease of ducting.

Generous Serviceability
Spacious design for ease of serviceability.
Introducing the Total Air System by Ingersoll Rand

The high-efficiency compressor room… without the need for an actual room

The Fully-integrated Air System
The Right Choice to Maximize Productivity
At the same time as eliminating the task of selecting separate components, and reducing the extensive space requirements of the traditional compressed air system, the Total Air System will provide your business with maximum efficiency, reliability, flexibility and productivity.

Smart Integration
A Revolutionary Advancement
Going far beyond combining the compressor, dryer and filters in one package, smart integration also:

- Eliminates vulnerable interconnecting piping
- Minimizes pressure losses and drops
- Integrates the compressor, dryer and controls into an energy-reducing, optimized system
- Incorporates the entire supply-side system into one whisper-quiet package, enabling installation virtually anywhere
- Provides generous space to promote cooling and to allow unobstructed service
Dry and Clean Compressed Air
The Right Air Quality to Do the Job
All Total Air System packages come fully equipped with an integral, energy-saving air treatment center including a high-performance air dryer and filtration pack to remove water, oil and particles from the airstream.

All components are perfectly matched to deliver the right air quality to increase air-powered tool and system equipment life.

High-efficiency Components
Setting the Standard in System Design
The Total Air System incorporates only the highest quality components to ensure that both system efficiency and productivity are maximized—a high-efficiency compressor room without the hassle, complexity and costs of the traditional compressor room. Total Air System packages come fully equipped with:

- A high-efficiency rotary screw air compressor
- An energy-saving, cycling refrigerated air dryer
- A high-efficiency coalescing filter
- A high-efficiency particulate filter
- An integral air receiver storage tank
- Integrated compressor and dryer controls
- Low pressure drop piping
- A high-efficiency moisture separator
- Whisper-quiet, low sound operation

Lifetime Benefits
Benefits are virtually endless…

- Plug-and-play simplicity — eliminates the leading causes of failure in air systems: incorrect sizing and installation
- Virtually no install costs — eliminates 80% of install time, material and costs
- Integral packaging saves valuable floor space for other uses
- Lifetime power savings through highly efficient components
- Increased productivity through better air quality — eliminates water and corrosion resulting in extended tool and equipment life
- Whisper-quiet operation enables installation closer to point-of-use, which can eliminate hundreds of feet in piping and costly pressure drops
Integral Air Treatment

**Dual Filtration Pack**
Clean Air to Drive Productivity
- Two stages of filtration deliver best performance, reduce pressure losses and extend operating life
- Particulate removal to industry-leading 1 micron
- Oil removal down to 0.01 micron
- Longer element life, lower pressure drop
- Better air quality delivered to tools and equipment results in longer life

**Energy-saving Refrigerated Air Dryer**
Dry Air-to-drive Productivity
- Cycling dryer – automatically shuts off with the compressor, saving energy compared to traditional dryers, which run continuously
- Stainless steel, brazed heat exchanger for low losses, high thermal efficiency and long service life
- Solenoid drain valve and high-efficiency moisture separator to permanently discharge condensate
- Eliminates corrosion of piping—a cause of premature wear of tools and seals
**Smart Integration**
Advanced Packaging to Drive Reliability and Uptime

- Integrealy cooled with common blower to ensure cooling is achieved 100% of the time that compressor is running
- Spacious design promoting serviceability
- Package pre-filter for longer cooler life and lower pressure drops
- Simplified piping eliminates potential leaks
- Single-point condensate drain system instead of separate points – eliminates leaks
- Patented segregated package cooling compartment provides advanced cooling flow management and reduces noise level

---

**Progress is greener with Ingersoll Rand**

Ingersoll Rand offers industry-leading products and solutions that enable businesses around the world to reduce energy consumption and costs and decrease harmful environmental emissions. From air compressors that reduce energy consumption to electric-powered golf cars with near-zero emissions, Ingersoll Rand provides the knowledge, experience and solutions to help our clients achieve their sustainability goals.
There is More to Value than Simply Price

The commitment of many thousands of dedicated compressed air specialists, either directly employed or members of a select market channel partnership, mean that friendly Ingersoll Rand support is close at hand. In addition to parts availability, qualified on-site service is available globally.

Ease of Service

No matter what the industry or location, Ingersoll Rand is committed to serving you 24 hours a day, seven days a week. Our worldwide network of distributors, engineers and certified, factory-trained technicians, are a phone call away — ready to support you with innovative and cost-effective service solutions that will keep you running at peak performance.

Ultra Coolant™

Save costs with the advanced synthetic compressor coolant supplied as standard. Ultra Coolant™ reduces friction and wear, has a long operating life, has simple condensate separation characteristics and is biodegradable.

PackageCare is a service contract designed to help customers get the most out of their air system investment. Whether it’s Ingersoll Rand equipment or a competitor’s, a new compressor or used, with PackageCare customers get hassle-free system reliability, backed by the most comprehensive service program in the industry. We’re the only OEM in the industry offering this type of service coverage.

Ingersoll Rand Industrial Technologies provides products, services and solutions that enhance our customers' energy efficiency, productivity and operations. Our diverse and innovative products range from complete compressed air systems, tools and pumps to material and fluid handling systems and environmentally friendly microturbines. We also enhance productivity through solutions created by Club Car®, the global leader in golf and utility vehicles for businesses and individuals.
