ORSCO lubrication systems

- Extend chain life and reduce oil consumption
- Short-term return on investment (ROI)
- Cleaner conditions, less downtime and overall energy savings
The secret of the ORSCO series 170 is its unique ability to provide the right amount of lubricant, at the right location and at the right time, by delivering a small amount of lubricant on a continual and controlled basis. There are no worries about reliability or durability as the ORSCO series 170 has been tested at the maximum injector rate for millions of cycles.

**Pulp and paper industry**

**Spray nozzle advantage: Cleaning effect**
Applying lubricant in a continuous fashion provides the best ongoing continual maintenance for your chain and keeps all the moving parts as clean as possible, as shown.

**ORSCO series 170**

**The ORSCO concept**

- **Delivery system**
- **Spray component**

**Systems**
- VS and VSR series (OEMs - PLC)
- 170 series (Standard - timer)
- 200 series (Customized)
- 300 series (Fully monitored)

There is one air and oil line per injector/nozzle pair

**Standard spray nozzles**
- SWN, SFN, STN (Continuous)
- TPN, TFN, TCN (Pulse)

**ORSCO system components**

- **Timer/PLC controls**
- **Reservoir**
- **Solenoid valve**
- **Oil injector**
- **Air pressure regulator**
- **Spray nozzle**
- **Air/oil mix**

System air pressure [70 to 120 psi (4,75 to 8,1 bar)]
A complete system
- Original equipment manufacturer (OEM) or installed on site
- Combines controls, valves stack and reservoir

High-output capacity
- Half drop (0.015 cc)
- Two drop (0.060 cc)
- Can deliver up to four drops per second (combined injector output) for large amounts of lubrication
- Available in both non-adjustable and adjustable versions

Compact and easy to maintain
- Manifold design, compact
- Can service part of assembly if necessary
- Easy to set up

Applications
- High-speed conveyors
- Baking and processing ovens
- Overhead conveyors
- Lubricate up to 16 points with one system
- Numerous control options
- Part lubrication
- Material coverage

Features and benefits
- Fixed volume delivery improves lubricant control
- High injector cycle rate (up to 1 Hz) can accommodate applications requiring large amounts of lubricant
- Three-piece reservoir design makes fluid levels easy to see and the component easy to clean and field repair
- Compact modular design with minimal external piping is ideal for OEM applications
- Patented spray nozzle design
- Easily adaptable modular package

Modular packages for OEMs and end-users

Valve stack (VS) series
The valve stack, the heart of the ORSCO family of lubrication products, comes standard with one control network per stack and feeds up to eight injectors. This is a great lubrication solution when matched with a customer’s programmable logic controller (PLC) and existing fluid source.

Note: Filter pressure switch is not standard with the VS series product.

Valve stack-reservoir (VSR) series
By adding a reservoir and a filter pressure switch, this package comes ready to work with a customer’s timer or programmable logic controller (PLC).
Ideal for many industries

**Series 170 system**
A standard and easy-to-install system for up to 16 lubrication points with multiple variations to choose.

**ORSCO series 200 and 300**
Series 200 is available for custom solutions requiring over 16 points of lubrication.
Series 300 is for real-time pressure monitoring of lubrication system.

- Pulp and paper industry
- Beverage industry
- Textile industry (tenter frame applications)
- Waste water treatment
Customized oil spray nozzles
If necessary, ORSCO will custom design nozzles or systems specific to the particular application.

At ORSCO . . .
• We don’t make lubricants, we make lubricants work better!
• We don’t make chains, we make chains last longer!
• We don’t make machines, we make machines more productive!

1) Tenter frame applications
Patented precision delivery nozzles

Choose from three tip lengths and three spray patterns for versatility in any continuous or pulsed spray design application. These nozzles feature 1/4-20 tapped (#10 screw clearance) mounting holes and durable aluminum construction.

Standard nozzles

- SWN = Continuous spray
- TPN = Pulse spray

Body style

- IL = In line
- SS-IL = Stainless steel in line
- LP = Low profile
- SS-LP = Stainless steel low profile

Fittings

- NC = Nylon compression fitting - standard
- NY = Nylon push in tube fitting
- CS = Carbon steel fitting (steel tubing)
- SS = Stainless steel fitting (steel tubing)
- XX = No fittings

Oil lines
- Nylon - 3/16 in. tubing
- Steel tube - 1/4 in. OD tubing

Air lines
- Nylon - 1/4 in. tubing
- Steel tube - 1/4 in. OD tubing

Spray pattern angle

- 00 = 0° (straight)
- 45 = 45°
- 90 = 90°

Tip length

- 1 = 1 in.
- 2 = 2 in.
- 3 = 3 in.

  - Pulse-Spray Nozzle Assembly applications and slow moving chains
- TFN
  - Pulse-Spray 360° Fan Nozzle
  - Bore lube and general assembly applications
- TCN
  - Pulse-Spray Cone Nozzle
  - Engine and general assembly applications
- SWN standard
  - Continuous-Spray Nozzle
  - Chain/gears/exposed bearings/assembly applications
- SFN
  - Continuous-Spray 120° Fan Nozzle
  - Metal stamping/metal forming/food applications
- HFN
  - Continuous-Spray High-Flow Nozzle
  - Spindle applications
Packaged systems

170 series
A standard and easy-to-install system for up to 16 lubrication points. Systems include an internal timer to control injector cycle rate. **Note:** Dual network indicates that half of the lubrication points are controlled by their own timer. Package includes appropriate number of spray nozzles of the type SWN-LP-NC-00-3, stainless steel nozzle mounting bracket and 25 ft. (7.6 m) nylon lines per lubrication point.

1) For double-drop injectors replace ‘5’ with a ‘2’ (i.e., 170-214A0)
2) For 24 V DC voltage replace ‘A’ with ‘D’ (i.e., 170-524DO)

VSR series
ORSCO valve stack with reservoir and filter regulator/pressure switch. The system comes ready to work with a customer’s timer or PLC. Package includes appropriate number of spray nozzles of the type SWN-LP-NC-00-3, stainless steel nozzle mounting bracket and 25 ft. (7.6 m) nylon lines per lubrication point.

Note: Packaged systems are for continuous spray applications only.

The Power of Knowledge Engineering
Combining products, people, and application-specific knowledge, SKF delivers innovative solutions to equipment manufacturers and production facilities in every major industry worldwide. Having expertise in multiple competence areas supports SKF Life Cycle Management, a proven approach to improving equipment reliability, optimizing operational and energy efficiency and reducing total cost of ownership.

These competence areas include bearings and units, seals, lubrication systems, mechatronics, and a wide range of services, from 3-D computer modeling to cloud-based condition monitoring and asset management services. SKF’s global footprint provides SKF customers with uniform quality standards and worldwide product availability. Our local presence provides direct access to the experience, knowledge and ingenuity of SKF people.
