Understanding Parflex Hoses

Parflex hoses are designed to handle extremes. They are used in some of the harshest applications around, such as over-the-sheave or aerial lift because they are specifically designed to handle extreme abrasion, temperatures, flexing, impulse and other factors that cause many hoses to fail.

Hydraulic & Pneumatic Hose Selection

Parflex offers several lines of hydraulic and pneumatic hoses; General Hydraulic, Specialty and Hybrid hoses. Specialty hoses were designed to solve specific application problems. Hybrid Hoses belong specifically to Parflex, with no exact competitor equivalents. These hoses were developed to cross typical SAE boundaries and meet specific challenges our customers were bringing to us.

The visual index and hose pages indicate which hoses are Hybrid designs.

Review the STAMPED guide (Size, Temperature, Media, Application, Pressure, End Configuration, and Delivery Preferences) on page 11 to help narrow your search for the desired product.

Fluoropolymer Selection

Parflex offers two lines of Fluoropolymer Hoses; the traditional Parflex PTFE hoses, many that meet 100R14 standards, and the PAGE hose line, comprised of specialty braid and construction options.

Hoses in PAGE product line are manufactured with materials that are compliant to the following standards:

- FDA 21 CFR 177.1550 and 177.2600
- USP Class VI
- Pharmacopoeia 3.1.9
- ISO 10093, Sections 5, 6 10 and 11
- USDA Standards
- 3A Standards

The visual index and hose pages indicate which hoses are from the PAGE product line.

Hose Assemblies

To determine hose part numbers for assemblies use the following nomenclature pages:

- Parflex Thermoplastic Hose Assembly Nomenclature pg. A-18
- Parflex PTFE Hose Assembly Nomenclature pg. A-19
- PAGE Product Line - Industrial S30 & S40 Hose Assembly Nomenclature pg. A-20
- PAGE Product Line - “True-Bore” & Convoluted Hose Assembly Nomenclature pg. A-21

For detailed ordering information, please consult price list or contact Parflex® Division.
How to Read the Hose Section

<table>
<thead>
<tr>
<th>Part Number</th>
<th>Nominal I.D.</th>
<th>Maximum O.D.</th>
<th>Maximum Working Pressure</th>
<th>Minimum Bend Radius</th>
<th>Weight</th>
<th>Permanent Fitting Series</th>
</tr>
</thead>
<tbody>
<tr>

<td>43/HY</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Base part number example.

**NOTE:** The primary dimensions are in black. The metric/inch equivalents appear in blue.

1. **Part Number**
   Hose Series Part Number - When two part numbers are listed, the second number is the static-dissipative or non-conductive design.

2. **Inside Diameter**
   A critical value along with pressure when calculating fluid flow rate and pressure drop.

3. **Outside Diameter**
   A critical measurement when considering hose fittings and applications where envelope size is limited.

4. **Working Pressure**
   Working pressure rating must meet or exceed the maximum operating pressure of the system including pressure spikes.

5. **Minimum Bend Radius**
   Minimum radius that the hose can be bent. Exceeding the bend radius can cause kinking, inner tube washout, or excessive stress on reinforcement resulting in shortened service life.

6. **Weight**
   Provided where weight is a critical parameter in the design of the system.

7. **Approved Fitting**
   Permanent or field attachable fitting series approved for selected hose. Products with no fitting selection are only available in factory built assemblies.
Hose Constructions

Thermoplastic Hose Construction

1. Core
   Contains Media
   Materials: Nylon, Polyethylene, Polyurethane, Copolyester

2. Reinforcement
   Provides Resistance to Internal Pressure
   Materials: Fiber (Nylon, Polyester, Aramid), Steel, Stainless Steel

3. Cover
   Protects Reinforcement
   Advantages: Aesthetics, Color and Marking
   Materials: Polyurethane, Nylon, Synthetic Rubber, Copolyester, Polyurethane, Proprietary Blend (PFX)

Fluoropolymer Hose Construction

1. Core
   Contains Media
   Materials: PTFE Smoothbore or Convoluted, PFA

2. Reinforcement
   Provides Resistance to Internal Pressure
   Materials: Steel, Stainless Steel, Polypropylene, Nomex®, Proprietary Composite

3. Cover or Protective Sleeve
   Protects Reinforcement
   Materials: Silicone, Polyolefin, EPDM Rubber

Nomex® is a registered trademark of DuPont.

For detailed ordering information, please consult price list or contact Parflex® Division.

</table>

* See pg. E-4 for detailed list of available fitting configurations.

### Overall Length

Expressed in inches

**NOTE:** Face Seal type fittings are measured from sealing face.

### Displacement Angle

Specified only if two elbow fittings are used to construct hose assembly.*

*Starting with either end as the far end, measure the angle clockwise to describe the displacement of the near end.

- **Tube Stub Fittings**
  - Tube Stub: 91
  - Tube Stub Step Up: 93
  - Tube Stub Step Down: 95
  - SAE Male Compression: 96

- **Inverted Flare & Power Trim Fittings**
  - Male Straight: 76

### Fitting Material
- Stainless (SS): S
- Brass: B
- Carbon Steel: C

### Accessory Code
- None: 
- Spring Guard: S
- Armour Guard: A
- End Bend Restrictors: E
- Fire Sleeve: F
- Rubber Sleeve: H
- FEP Heat Shrink: T
- Polyolefin Heat Shrink: P
- Silicone Sleeve: M
- Internal Spring: 
- Vacuum Spring Wire: W
- Specials: X

### Example:
- **X08H10S68S0-0300**
- **Size**: 08 (13/32 I.D.)
- **Style**: S40
- **Braid**: SS Single Braid
- **Core**: Heavy Wall Smoothbore Convoluted PTFE
- **End 1**: 1/2” 316 SS Male NPT
- **End 2**: 1/2” 316 SS Female 37° Seat JIC Swivel

### Length:
- 300” from end of Male Pipe to seat of Female JIC

### NOTE:
Length calculations for PAGE hose assemblies are typically made sealing surface to sealing surface per the NAHAD Fluoropolymer Hose Assembly Specification Guidelines unless otherwise requested by customer at time of order.

D6 – Hybrid Hose

Features
- Ideally suited for inventory consolidations to cover all SAE 100R1 pressure and many SAE 100R2 pressure requirements.

Certifications
- Exceeds SAE 100R17
- MSHA Accepted

Applications/Markets
- Medium pressure hydraulic applications
- Agricultural Equipment
- Construction Equipment
- Lubricating Oils
- Transportation

Construction
Tube: Copolyester
Reinforcement: One or two braids of high tensile steel wire
Cover: Smooth synthetic rubber

Operating Parameters
Temperature Range:
-40°F to +250°F (-40°C to +121°C)
Limited to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids)
Change in length at working pressure is +2% to -4%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Part Number | Nominal I.D. | Maximum O.D. | Maximum Working Pressure | Minimum Bend Radius | Vac. Rating Hg./73°F | Weight lbs./ft. | Permanent Fitting Series
--- | --- | --- | --- | --- | --- | --- | ---
D604 | 1/4 | .51 | 13 | 3,000 | 20.7 | 2.00 | 51 | 28 | .12 | .18 | 43**HY***
D606 | 3/8 | .67 | 17 | 3,000 | 20.7 | 2.50 | 64 | 28 | .19 | .28 | 58/43**HY***
D608 | 1/2 | .82 | 21 | 3,000 | 20.7 | 3.50 | 89 | 28 | .29 | .43 | 58/43**HY***
D610* | 5/8 | 1.02 | 26 | 3,000 | 20.7 | 4.00 | 102 | 28 | .47 | .70 | 58/HY***
D612* | 3/4 | 1.20 | 30 | 3,000 | 20.7 | 4.80 | 122 | 28 | .73 | 1.09 | 43**HY***
D616* | 1 | 1.50 | 38 | 3,000 | 20.7 | 6.00 | 152 | 28 | 1.01 | 1.50 | 43**HY***

Fittings
58 Series – pg. E-12
43 Series – (**43 Fittings available from Parker Hose Products Division)
HY Series – pg. E-107 (**HY Fittings available from Parker Hose Products Division)
For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

Colors
- Black

Notes
*Two wire braid
D6R – Hybrid Hose

Features
- Long continuous package lengths available
- Up to 40% lighter than comparable rubber hoses
- Wide range of fluid compatibility
- Compact hose construction
- Bend radius less than half of conventional SAE 100R1 & 100R2 hoses
- UV resistant cover
- Low force to flex
- 3,000 psi working pressure

Applications/Markets
- Medium pressure hydraulic applications
- Agricultural Equipment
- Construction Equipment
- Lubricating Oils
- Transportation

Certifications
- ISO 11237 Type R17
- SAE 100R17
- MSHA accepted

### Features
- Long continuous package lengths available
- Up to 40% lighter than comparable rubber hoses
- Wide range of fluid compatibility
- Compact hose construction
- Bend radius less than half of conventional SAE 100R1 & 100R2 hoses
- UV resistant cover
- Low force to flex
- 3,000 psi working pressure

### Construction
- Tube: Copolyester
- Reinforcement: Steel wire
- Cover: Smooth synthetic rubber

### Operating Parameters
- Temperature Range:
  - Petroleum base hydraulic fluids and lubricating oils within a temperature range of -40°F to +250°F (−40°C to +121°C)
  - Synthetic, synthetic blend, water, and water/oil emulsion hydraulic fluids up to +185°F (−85°C)
  - Water/glycol hydraulic fluids up to +135°F (−57°C)
- Vacuum Rating: 28 inch Hg
- Change in Working Length @ Max. Working Pressure: ±2%/–4%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

### Fittings
- 55 Series – pg. E-12
- 56 Series – pg. E-36
- HY* Series – pg. E-107
  (HY Fittings available from Parker Hose Products Division)
- HY fittings are only approved on an adjustable crimper

For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

### Color
- Black

HFS – Fire-Screen® Hybrid Hose

Features
- Excellent flexibility
- Consistent long-lengths
- Lightweight
- Compact design

Certifications
- Exceeds SAE 100R1
- Marine Applications (SAE J1942 listed)
- MSHA Accepted

Applications/Markets
- Used in high temperature (to +250°F), medium pressure hydraulic applications
- Mobile Equipment
- Machine Tools
- Agricultural Equipment

Construction
Tube: Copolyester
Reinforcement: One braid of high tensile steel wire
Cover: Smooth synthetic rubber

Operating Parameters
Temperature Range:
- -40°F to +250°F (-40°C to +121°C)
  (Limitied to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids)
Change in length at Max. Working Pressure: +2% to -4%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

HFSR Hybrid Hose with Rubber Cover

Features
- Long package lengths typical, up to 500 foot
- Increased oil, ozone and impulse resistance
- Up to 40% lighter than comparable rubber hoses
- UV resistant cover
- Low force to flex
- Low length change under pressure
- Patented process that bonds the core to the reinforcement
  - resists kinking
  - resists core wash out

Applications/Markets
- Industrial
- Material Handling
- Construction
- Waste & Refuse
- Utility Equipment
- Paving and road maintenance

Certifications
- Meets or exceeds SAE J517-100R1
- Meets or exceeds ISO Pressure standards

Construction
- Tube: Copolyester
- Reinforcement: Steel wire
- Cover: Smooth synthetic rubber

Operating Parameters
Temperature Range:
- Petroleum base hydraulic fluids and lubricating oils within a temperature range of -40°F to +250°F (-40°C to +121°C)
- Synthetic, synthetic blend, water, and water/oil emulsion hydraulic fluids up to +185°F (+85°C)
- Water/glycol hydraulic fluids up to +135°F (+57°C)

Vacuum Rating: 28 inch Hg
Change in length at Max. Working Pressure: +2% to -4%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
- 55 Series – pg. E-12
- 56 Series – pg. E-36
- HY Series – pg. E-107
- HY fittings are only approved on an adjustable crimer

Crimp information can be found online, for most Parker products, at www.parker.com/crimpsource

HY Series – pg. E-107 (HY Fittings available from Parker Hose Products Division)

For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource

Access instructions are on pg. G-13

Color
- Black

Notes
Reference Parflex Safety Guide in Catalog 4660 for complete guidelines on hose selection and maintenance
HFS2 – Fire-Screen II® Hybrid Hose

Features
- Excellent flexibility
- Consistent long-lengths
- Lightweight
- Compact design

Certifications
- Meets/Exceeds SAE 100R2 & 100R16
- Marine Applications (SAE J1942 listed)
- MSHA Accepted

Applications/Markets
- Medium pressure hydraulic applications
- Mobile Equipment
- Machine Tools
- Agricultural Equipment

Construction
Tube: Copolyester
Reinforcement: One or two braids of high tensile steel wire
Cover: Smooth synthetic rubber

Operating Parameters
Temperature Range:
- -40°F to +212°F (-40°C to +100°C)
  (Limited to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids)
Change in length at Max. Working Pressure: +2% to -4%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

H6 – High Performance Hydraulic Hose

**Features**
- Largest temperature range in a medium pressure hydraulic hose
- Low length change capability under pressure
- Ideally suited for inventory consolidations to cover all SAE 100R1 pressure and many SAE 100R2 pressure and abrasion requirements

**Certifications**
- Exceeds SAE 100R17 Requirements

**Applications/Markets**
- Medium pressure hydraulic applications
- Over-the-sheave and boom hose applications

HTB – Eliminator® Hybrid Hose

Features
- Four-spiral wire hose performance in a high tensile two-wire braid construction
- Excellent flexibility
- Consistent long-lengths

Certifications
- Marine Applications (SAE J1942 listed)
- MSHA Accepted

Applications/Markets
- High-pressure hydraulic applications typically reserved for spiral wire reinforced hoses

**Notes**
HTB04 cover must be skived prior to fitting attachment.

**Construction**
- Tube: Copolyester
- Reinforcement: Two braids of high tensile steel wire
- Cover: Smooth synthetic rubber

**Operating Parameters**
- Temperature Range: -40°F to +212°F (-40°C to +100°C)
  (Limited to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids)
- Change in working length @ Rated WPSI: +2%/-4%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

**Fittings**
- 43 Series – (**43 Series Fittings available from Parker Hose Products Division**)
- HY Series – pg. E-107 (**HY Fittings available from Parker Hose Products Division**)
- Crimp information can be found online, for most Parker products, at www.parker.com/crimpsource
- Access instructions are on pg. G-13

**Colors**
- Black

**Notes**
HTB04 cover must be skived prior to fitting attachment.
HTBR – Eliminator® Hybrid Hose

Features
- 3500 psi to 7000 psi working pressures
- Wide range of fluid compatibility
- Compact O.D.
- Low force to flex
- UV & Ozone resistant cover
- Low length change under pressure

Certifications
- MSHA Accepted

Applications/Markets
- General Hydraulic Applications
- Lubricating Oils
- Construction Equipment
- Agriculture Equipment

560/560R – General Hydraulic Hose

Features
- Twin or multi-line available. Lighter and smaller than 100R1 with longer lengths
- Fast response hose
- Polyurethane cover for best abrasion resistance

Certifications
- Meets/Exceeds SAE 100R1
- MSHA Accepted

Applications/Markets
- Hydraulic circuits and systems wherever 100R1 hose is specified
- Most synthetic hydraulic fluids, water and wide range of chemicals
- Industrial equipment
- Machine Tools

563 – General Hydraulic Hose

Features
- Polyurethane cover for best abrasion resistance

Certifications
- Meets/Exceeds SAE 100R17
- MSHA Accepted

Applications/Markets
- Industrial medium pressure hydraulic hose for use with petroleum, water base and synthetic hydraulic fluids, gases and some solvents and chemical solutions

Construction
- Tube: Copolyester
- Reinforcement: High tensile steel wire braid
- Cover: Polyurethane

Operating Parameters
- Temperature Range:
  - -40°F to +250°F  [-212°F for size -8]
  - (4°C to +121°C)  [100°C for size -8]
- (Limited to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids)
- Change in length at Max. Working Pressure: ±2%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
- 55 Series - pg. E-12
- HY Series - pg. E-107 (*HY Fittings available from Parker Hose Products Division)
- For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
- Access instructions are on pg. G-13

Colors
- Black

Notes
- Non-perforated cover
590 – General Hydraulic Hose

Features
- Two wire strength, one wire construction, improved bend radius results
- Twin and multi-line available
- Polyurethane cover for best abrasion resistance

Certifications
- Meets/Exceeds SAE 100R2 / 100R16
- MSHA Accepted
- *ABS Approved - 590-4, 590-6, and 590-8

Applications/Markets
- Construction Equipment
- Machine Tools
- Hydrostatic Transmission
- Refuse Vehicles
- Agriculture Equipment

593 – General Hydraulic Hose

Features
- Works with synthetic hydraulic fluids, water and a range of chemicals
- Two wire strength with one braid flexibility
- Polyurethane cover for best abrasion resistance

Certifications
- Meets/Exceeds SAE 100R2 Pressure Requirements
- MSHA Accepted
- ABS Approved

Applications/Markets
- General Hydraulic Service

Notes
Non-perforated cover
510A – Refrigerant Hose

**Features**
- Excellent impulse life
- Compatible with most common hydraulic and refrigeration fluids

**Certifications**
- Meets/Exceeds SAE 100R7 except -2
- MSHA Accepted except -4, -5, -6

**Applications/Markets**
- Medium pressure service for both field attachable and permanent fittings
- Used with most common refrigerants

**Construction**
- Tube: Proprietary nylon blend
- Reinforcement: Fiber
- Cover: Polyurethane

**Operating Parameters**
- Temperature Range: 
  -40°F to +212°F (-40°C to +100°C)
- Change in length at Max. Working Pressure: ±3%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

**Fittings**
- 51 Series – pg. E-5
- 55 Series – pg. E-12
- 56 Series – pg. E-36
- 57 Series – pg. E-58

For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

**Colors**
- Black

**Notes**
- Perforated cover
- 51 Series field attachable couplings are not intended for use on hose that has previously been in service

Construction
- Tube: Copolyester
- Reinforcement: Fiber
- Cover: Proprietary Blend (PFX)

Operating Parameters
- Temperature Range: -40°F to +212°F (-40°C to +100°C)
- Limited to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids
- Change in length at Max. Working Pressure: ±2%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
- 51 Series – pg. E-5
- 55 Series – pg. E-12
- 56 Series – pg. E-36
- 57 Series – pg. E-58
- For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
- Access instructions are on pg. G-13

Colors
- Black

Notes
- Perforated cover
- “3/16” and 1/4” working pressure reduced to 3,000 and 2,750 psi respectively when using field attachable couplings
- 51 Series field attachable couplings are not intended for use on hose that has previously been in service
518C – Non-Conductive Hose

**Features**
- Twin or multi-line constructions available
- High density braid for maximum impulse life without loss of flexibility

**Certifications**
- Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per ft.
- Meets/Exceeds SAE 100R7 specifications and Electrical Standards except 518C-2 with respect to maximum working pressure
- ANSI A92.2

---

### Applications/Markets

- Medium pressure hydraulic service where both field attachable and permanent hydraulic circuit exposure and contact with high voltage may be encountered

---

### Construction

**Tube:** Copolyester  
**Reinforcement:** Fiber  
**Cover:** Proprietary Blend (PFX)

### Operating Parameters

**Temperature Range:**  
-40°F to +212°F (-40°C to +100°C)  
(Limited to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids)  
Change in length at Max. Working Pressure: ±2%

**Min. Burst Pressure:**
- 4:1 Design Factor is required if hose failure will result in movement of aerial device  
- 3:1 Design Factor is acceptable if hose failure will not result in movement of aerial device  
SAE requires 4:1 Design Factor

### Colors

- Orange

### Fittings

51 Series - pg. E-5  
55 Series - pg. E-12  
56 Series - pg. E-36  
57 Series - pg. E-58

For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource  
Access instructions are on pg. G-13

### Notes

- Non-perforated cover  
- Lay lines on this hose will have both ANSI and SAE maximum working pressure listed. ANSI A92.2  
  "Vehicle Mounted Elevating and Rotating Aerial Devices"  
  “3/16” and 1/4” working pressure reduced to 3,000 and 2,750 psi respectively when using field attachable couplings

51 Series field attachable couplings are not intended for use on hose that has previously been in service

For detailed ordering information, please consult price list or contact Parflex® Division.
### 518D – Non-Conductive Hose

**Features**
- Nylon core for maximum resistance to permeable fluids.
- Heavier cover for super high abrasion resistance. (518D-4)
- Heavier cover makes splitting bonded hose easier. (518D-4)
- Super high density braid allows smaller braid O.D. (518D-4)
- Twin or multi-line constructions available.

**Certifications**
- Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per ft.
- Meets/Exceeds SAE 100R7 specifications
- ANSI A92.2

### Applications/Markets
- Medium pressure hydraulic service
- Aerial Lift

### Construction
- Tube: Nylon
- Reinforcement: High Strength Synthetic Fiber
- Cover: Proprietary Blend (PFX)

### Operating Parameters
- Temperature Range: -40°F to +212°F (-40°C to +100°C)
- Change in length at Max. Working Pressure: ±2%
- Min. Burst Pressure:
  - 4:1 Design Factor is required if hose failure will result in movement of aerial device
  - 3:1 Design Factor is acceptable if hose failure will not result in movement of aerial device
- SAE requires 4:1 Design Factor

### Certifications

Fittings
54 Series – pg. E-8
For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

Colors
- Black

Notes
*Factory-made assemblies only -3, -5 and -8
Approved with rapid assembly fitting system
Perforated cover
520N/528N – General Hydraulic Hose

Features
- Twin and multi-line available
- Fast response, lighter and smaller O.D. than 100R2 hose

Certifications
- Meets/Exceeds SAE 100R8
- 520N MSHA Accepted
- 528N Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per foot

Applications/Markets
- Hydraulic and pneumatic circuits and systems
- Ideal in hot water applications

For detailed ordering information, please consult price list or contact Parflex® Division.

526BA – Breathing Air Refill Hose

Features
• 6000 psi Constant Pressure

Certifications (Complies with:)
• CGA G7.1-1 Grade E Breathing Air Standards
• NFPA 1901

Applications/Markets
• Integrated containment fill stations
• Mobile and stationary systems with or without cascade controls
• Mobile Trailer/Truck Systems
• Portable SCBA Fill

Construction
Tube: Nylon
Reinforcement: Aramid fiber
Cover: Polyurethane

Operating Parameters
Temperature Range:
-40°F to +180°F (-40°C to +82°C)
Change in length at Max. Working Pressure: ±2%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
55 Series – pg. E-12
For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

Colors
• Gray

Notes
Perforated cover
Not for use as part of a SCBA systems
This hose is not for use between a pressure reducing regulator and breathing mask
For fitting attachment lubricate only with water or non-toxic lubricant. Do not assemble with petroleum or hydrocarbon based lubricants. Do not flush with solvents of any kind
This hose does not contain a conductive element; therefore, it should not be used with explosive gases such as pure oxygen and hydrogen
Hose is compliant with CGA Grade E Breathing Air Standards, however air quality is dependent upon all system components

53DM/538DM – DuraMax™ Low Temperature

**Features**
- Matte cover for low coefficient of friction
- Superior flexibility in cold temperature applications
- Better bend radius than SAE J517 and 100R7
- Smaller O.D.s than 100R7 and 100R18
- 3000 psi constant pressure

**Certifications**
- Meets/Exceeds SAE 100R18
- 538DM Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per foot

**Applications/Markets**
- Excellent over-the-sheave in lift truck applications
- Cold storage or refrigerated areas
- Construction and agriculture equipment in cold climates

540N – General Hydraulic Hose

Features
- Matte cover for low coefficient of friction
- Special order colors
- Twin or multi-line available
- Excellent chemical compatibility
- Greater range of fluid compatibility than SAE 100R1 hose

Certifications
- Meets/Exceeds SAE 100R7
- MSHA Accepted

Applications/Markets
- Hydraulic and pneumatic systems
- Agricultural Spraying
- Polyurethane Foam Mixers
- Fire-resistant Fluid
- Hot Water

## 55LT – Low Temperature Hose

### Features
- Twin and multi-line available
- Superior flexibility in cold temperature applications

### Certifications
- Meets/Exceeds SAE 100R7

### Applications/Markets
- Hydraulic systems exposed to very low temperatures
- Excellent over-the-sheave in lift truck applications
- Cold storage or refrigerated areas
- Construction and agriculture equipment in cold climates

569 High Pressure Hydraulic Hose

Features
- 10,000 psi working pressure
- Lightweight aramid fiber construction
- (20–45% lighter than comparable hoses)
- Bonded construction available
- Compact O.D. for improved routing and handling
- Excellent kink resistance

Certifications
- IJ-100 Requirements

Applications/Markets
- Hydraulic tools
- High pressure hydraulics
- High pressure pumps
- Jacking systems
- Emerging markets (Oil & Gas)

<table>

Construction
Tube: Nylon
Reinforcement: Aramid fiber
Cover: Polyurethane

Operating Parameters
Temperature Range:
-40°F to +176°F (-40°C to +80°C)
Vacuum Rating: 28 inch Hg
Change in length at Max. Working Pressure: ±2%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings (cont.)
- Seal-Lok (O-ring Face Seal) Female Swivel Straight (1J58-4-4)
- Seal-Lok (O-ring Face Seal) Female Swivel Short Straight (1C58-4-4)
- Male Straight Thread with O-ring (O-ring Boss) Straight (10558-4-4)

Colors
- Blue

Notes
Not to be used for pneumatic or gaseous service
Not to be used with chlorinated solvents
Factory built assembly only or assembled by Parker certified assembler
Assemblies require bend restrictors (HG569-4) to reduce the risk of exceeding the minimum hose bending radius at the fitting
Warning tag (569-4-TAG) required for all assemblies
Non-perforated cover

For detailed ordering information, please consult price list or contact Parflex® Division.
573X – Fast Response Hose

**Features**
- Fast response even over longer lengths
- 3000 psi constant pressure

**Certifications**
- MSHA Accepted -3 only

**Applications/Markets**
- Marine, offshore drilling
- Applications requiring fast and accurate response time

**Construction**
- Tube: Nylon
- Reinforcement: Aramid fiber
- Cover: Polyurethane

**Operating Parameters**

Construction
- Tube: Nylon
- Reinforcement: Fiber
- Cover: Polyurethane

Operating Parameters
- Temperature Range: -40°F to +212°F (-40°C to +100°C)
- Change in length at Max. Working Pressure: ±2%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
- 55 Series – pg. E-12
- 58H Series – pg. E-61
- For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
- Access instructions are on pg. G-13

Colors
- Black

Notes
- Non-perforated cover
580N/H580N/588N – High Pressure Hose

Features
- Twin and multi-line available
- Lighter weight and smaller O.D. than 100R2

Certifications
- Meets/Exceeds SAE 100R8 specifications
- 580N MSHA Approved
- 588N Meets SAE J517 for less than 50 micro-amps leakage under 75,000 volts per foot

Applications/Markets
- Hydraulic and pneumatic circuits and systems
- Replaces 100R2 rubber hose wherever greater flexibility, fluid compatibility, and cover durability are required

## 83FR – DuraGard™ General Purpose Polyurethane

![Image of Coiled Air Hose & Fittings](image-url)

### Features
- Weld spatter resistant
- Excellent abrasion resistance
- Extreme flexibility
- Compact bend radius
- Specially formulated polyurethane tube
- Twin-line or multi-line constructions available

### Certifications
- MSHA Accepted
- Non-conductive per SAEJ343 test procedures for thermoplastic hose
- UL94HB compliant

### Applications/Markets
- General purpose air and water hose often used in robotic welding applications

### Construction
- Tube: Specially formulated polyurethane
- Reinforcement: Fiber
- Cover: Polyurethane

### Operating Parameters
**Temperature Range:**
- -20°F to +200°F (-29°C to +93°C)

**Change in length at Max. Working Pressure:** ±2%

**Min. Burst Pressure**
- 4x Max. Working Pressure at 73°F (23°C)

### Fittings
- 55 Series – pg. E-12
- 56 Series – pg. E-36
- 82 Series – (*82 Series Fittings available from Parker Hose Products Division)

For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource.

Access instructions are on pg. G-13

### Colors
- Black (BLK)
- Blue (BLU)
- Brown (BRN)
- Green (GRN)
- Gray (GRA)
- Red (RED)

### Notes
- Temperature and pressure reduced with 82 series Push-Lok Fitting:
- -20°F to +145°F (-29°C to +63°C)
- 175 psi maximum working pressure

For -4 hose with 56 series fitting, use die P04J

Non-perforated cover

CNG – Electrically Conductive Compressed Natural Gas Hose

Features
- Twin constructions available

Certifications
Conforms to:
- NFPA 52
- ANSI/IAS NGV 4.2
- ECE R110 - Sizes -3 and -8 only for assemblies purchased through Parker Polyflex (Europe)
- CSA12.52

Applications/Markets
- CNG Dispenser/Refueling
- Fleet Transit/On-Vehicle
- CNG Fuel Transfer
- At-Home CNG Refueling

Construction
- Tube: Electrically conductive nylon
- Reinforcement: Fiber
- Cover: Polyurethane

Operating Parameters
- Temperature Range: -40°F to +180°F (-40°C to +82°C)
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
- Factory-made assemblies only
- 55 Series – pg. E-12
- 58 Series – pg. E-12
- 58H Series – pg. E-61
- For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
- Access instructions are on pg. G-13

Colors
- Red

Notes
- Perforated cover
- CNG hose must be assembled at the factory or by a Parflex approved facility
- Wire spring guards must be used on ANSI/CSA design certified CNG dispenser hose assembly sizes -3 through -8: single and multi-line bonded assemblies - pg. F-21

Accessories
- PSG - Wire spring guard
- CNGG - Vinyl hose guard
- Consult Parflex CAT. 4660 for CNG guard selection

**HLB – Lubrication Line Hose**

**Features**
- HLB remote lubrication system versus 1/4” rubber hoses can save money per line in reduced component and installation labor costs
- Unique GK bulkhead hose fittings with integrated nipple can save money per zerk connection in unnecessary adapter costs
- Compact 1/8˝ hoses save hundreds of dollars of waste in your operation by eliminating gallons of unnecessary “in-line” grease versus larger bore rubber hoses

**Applications/Markets**
- Grease and lubrication lines
- Agriculture
- Construction
- Industrial
- Material Handling

**Certifications**
- MSHA Accepted
- Mobile Equipment
- Transportation

**Construction**
- Tube: Copolyester
- Reinforcement: Fiber
- Cover: Polyurethane

**Operating Parameters**
- Temperature Range: -40°F to +212°F (-40°C to +100°C) with CY fittings
- (Limited to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids)
- BU Series Field Attachable Fitting limited to 120°F
- Change in length at Max. Working Pressure: ±3%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

**Fittings**
- BU Series – pg. E-100
- CY Series – pg. E-101
- For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
- Access instructions are on pg. G-13

**Colors**
- Black

**Notes**
- Not for use as a whip hose on hand-operated grease guns
- Bend restrictions are available only for permanent fittings.
- HBR (Hose Bend Restrictor) available for Marine Steering Hose Assemblies. See Hose Guard in Tooling Equipment and Accessories Section pg. F-18
- *HLB-2 - Guard P.N. CY02-652317

MSH – Marine Steering Fast Response Hose

Features
- Fast, accurate response
- Permanent or field attachable
- Salt water, corrosion resistant

Applications/Markets
- Wide range of marine applications
- Marine hydraulic steering systems

### Construction
- Tube: Nylon
- Reinforcement: Fiber
- Cover: Polyurethane

### Operating Parameters
- Temperature Range: -40°F to +200°F (-40°C to +93°C)
  (Limited to +135°F (+57°C) for synthetic hydraulic fluids and water-based fluids)
- Change in length at Max. Working Pressure: ±2%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

### Fittings
- MS Series - pg. E-125
  For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
  Access instructions are on pg. G-13

### Colors
- Black

### Notes
- Non-perforated cover
- Bend restrictions are available only for permanent fittings.
- HBR (Hose Bend Restrictor) available for Marine Steering Hose Assemblies. See Hose Guard in Tooling Equipment and Accessories Section pg. F-18
PTH – Marine Power Tilt Hose

Features
- Compact design
- Abrasion resistant polyurethane cover
- Excellent flexibility
- Corrosion resistant

Applications/Markets
- Power tilt mechanisms for outboard and stern drive engines
- Trim Tab assemblies
- Jack Plate assemblies

Construction
Tube: Nylon
Reinforcement: Fiber and Stainless Steel braid
Cover: Polyurethane

Operating Parameters
Temperature Range:
-40°F to +212°F (-40°C to +100°C)
Change in length at Max. Working Pressure: ±2%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
92 Series – pg. E-85
For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

Colors
- Clear

Notes
Non-perforated cover
Also available as custom order with black cover

S5N – Predator® Hose (Water Jetting/Lateral Cleaning)

Features
- Easily identified lime green cover signifies 4000 psi constant pressure
- Slim profile and light weight provide easy handling and routing

Certifications
- NSWMA (National Solid Waste Management Assoc.)
- WASTEC (Waste Equipment Technology Assoc.)
- WEMI (Waste Equipment Management Inst.)
- Specifications for repair/inspection procedures for high pressure hose used in conjunction with sewer/catch basin cleaning equipment

Applications/Markets
- High-pressure water equipment for cleaning or debris removal in lateral sewer lines
- Lines provide connection from commercial, industrial or residential structure to the main sewer line located under the streets
- Lateral lines are smaller in diameter than the main lines, and rely more on water pressure than water volume to clear residue and obstructions
- For water/slurry applications, contact Parflex for chemical compatibility recommendations

Factory-made assemblies only
Not for use in hydraulic applications
Perforated cover
S6 – Predator® Hose (Sewer Cleaning)

Features
- Easily identified orange cover signifies 2500 psi constant pressure
- Bonded construction provides excellent kink resistance and flexibility

Certifications
- NSWMA (National Solid Waste Management Assoc.)
- WASTEC (Waste Equipment Technology Assoc.)
- WEMI (Waste Equipment Management Inst.)
- Specifications for repair/inspection procedures for high pressure hose used in conjunction with sewer/catch basin cleaning equipment

Applications/Markets
- High-pressure and high-volume water equipment for cleaning or debris removal in large sewer lines
- For water/slurry applications, contact Parflex for chemical compatibility recommendations

Construction
Tube: Gray Copolyester, S624 – Gray Nylon
Reinforcement: Fiber
Cover: Polyurethane

Operating Parameters
Temperature Range:
-40°F to +135°F (-40°C to +57°C)
Min. Burst Pressure is 2.5x Max. Working Pressure at 73°F (23°C)

Fittings
58 Series – pg. E-12
SQ Series (Swage Only)– pg. E-127

- Easily identified blue cover signifies 3000 psi constant pressure
- Bonded construction provides excellent kink resistance and flexibility

Certifications
- NSWMA (National Solid Waste Management Assoc.)
- WASTEC (Waste Equipment Technology Assoc.)
- WEMI (Waste Equipment Management Inst.)
- Specifications for repair/inspection procedures for high pressure hose used in conjunction with sewer/catch basin cleaning equipment

Applications/Markets
- High-pressure and high-volume water equipment for cleaning or debris removal in large sewer lines
- For water/slurry applications, contact Parflex for chemical compatibility recommendations

Construction
Tube: Gray Copolyester
Reinforcement: Fiber
Cover: Polyurethane

Operating Parameters
Temperature Range:
-40°F to +135°F for water (-40°C to +57°C)
Min. Burst Pressure is 2.5x Max. Working Pressure at 73°F (23°C)

Fittings
58 Series – pg. E-12
SQ Series (Swage Only)– pg. E-127
HY Series – pg. E-107 (*HY Fittings available from Parker Hose Products Division)
For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

Colors
Blue

Notes
Factory-made assemblies only
All standard assembly lengths coupled with rigid male pipe each end
Not for use in hydraulic applications
Perforated cover
SLH – Sewer Leader Hose

Features
- Easily identified black cover indicates termination of hose

Certifications
- NSWMA (National Solid Waste Management Assoc.)
- WASTEC (Waste Equipment Technology Assoc.)
- WEMI (Waste Equipment Management Inst.)

Applications/Markets
- Leader hose for S5/S6/S9 high-pressure sewer cleaning hose

Duraflex™ Hydraulic Hose Coil

Features
- Bonded twin-line construction
- Self retracting coil design

Certifications
- Meets/Exceeds SAE 100R7
- Meets SAE J517 for less than 50 microamps leakage under 75,000 volts per foot

Applications/Markets
- Hydraulic tool hose for aerial lift applications
- General Hydraulics

### Nomenclature

**Configuration**
- HC twin-line hose coil
  - blank twin-line straight hose

**Hose Type (see specifications below)**
- 548N Med Pressure - straight or coiled

**End Connectors**
- 06MP 3/8" Rigid Male Pipe
- 06FJ 3/8" Female JIC Swivel

**Effective Working Length**
- 6 6 foot length
- 8 8 foot length
- 10 10 foot length
- 12 12 foot length

**Notes**
1) Part Number example shown is a stocked item.
2) Other combinations from this chart are readily available.
3) For options not shown, please consult Parflex Division.

### Construction
- Tube: Nylon
- Reinforcement: Fiber
- Cover: Polyurethane

### Operating Parameters
- Temperature Range: -40°F to +212°F (-40°C to +100°C)
- Change in length at Max. Working Pressure: ±2%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

### Fittings

For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource

Access instructions are on pg. G-13

### Colors
- Orange (Non-Conductive)

### Notes
- Non-perforated cover
919/919B – PTFE Hose

Features
- Excellent chemical compatibility
- Handles extreme temperatures to +450°F
- Environmentally safe
- Resists moisture
- Low friction minimizes pressure drops and deposits

Certifications
- Meets/Exceeds SAE 100R14A - 919
- Meets/Exceeds SAE 100R14B - 919B
- FDA CFR 177.1550 (Natural tube)

Applications/Markets
- Chemical Transfer Lines
- General Hydraulics
- Compressed Air/Gases
- Adhesive Dispensing
- Coolant Lines
- Medical Gases

### Construction
- Tube: 919 - Natural FDA Compliant PTFE
- 919B - Black Static-Dissipative PTFE
- Reinforcement: 304 Stainless Steel braid

### Operating Parameters
- Temperature Range: -100°F to +450°F (-73°C to +232°C)
- Change in length at Max. Working Pressure: +2% to -4%
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

### Fittings
- 90 Series – pg. E-65
- 91/91N Series – pg. E-72
- For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
- Access instructions are on pg. G-13

### Notes
- Use hose type 919B with static-dissipative core tube when conveying non-conducting fluids such as oils, paints, fuels, steam, etc.

919J – Silicone Covered PTFE Hose

Features
- Silicone cover provides a clean, smooth cover to protect the stainless steel wire reinforcement against wear, fraying and contaminants
- Steam cleanable

Certifications
- Meets/Exceeds SAE 100R14A
- FDA CFR 177.1550

Applications/Markets
- Chemical Transfer Lines
- General Hydraulics
- Compressed Air/Gases
- Adhesive Dispensing
- Coolant Lines
- Medical Gases

- Use hose type 929B with static-dissipative core tube when conveying non-conducting fluids such as oils, paints, fuels, steam, etc.
929BJ – Silicone Covered PTFE Hose (with Static-Dissipative Tube)

Features
- Silicone cover protects SS wire reinforcement against wear and fraying, up to 450°F
- Silicone cover provides clean, smooth cover and prevents contaminants from accumulating in braid
- Tight bend radius
- Excellent kink resistance
- Enhanced resistance to gas permeation due to increased PTFE wall thickness
- Steam cleanable

Applications/Markets
- Vacuum lines for high temperature autoclaves
- General Hydraulics
- Compressed Air/Gases

Construction
Tube: 939 - Natural FDA Compliant PTFE
939B - Black Static-Dissipative PTFE
Reinforcement: 304 Stainless Steel braid

Operating Parameters
Temperature Range:
-100°F to +450°F (-73°C to +232°C)
Change in length at Max. Working Pressure: +2% to -4%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
93N Series – pg. E-87
For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

Notes
Use hose type 939B with static-dissipative core tube when conveying non-conducting fluids such as oils, paints, fuels, steam, etc.
Not suggested for steam-cold water cycling applications
* 28 in/Hg can be obtained by using 2799 internal spring guard. See pg. F-20
943B – 3,000 psi W.P. High Temp Hose

Features
- High temperature hydraulic hose
- Excellent chemical compatibility
- Resists moisture
- Low friction minimizes pressure drops and deposits

Certifications
- Meets/Exceeds SAE 100R7 and SAE 100R17

Applications/Markets
- High temp hydraulic applications
- Chemical Transfer
- Compressed Air/Gases
- Paint Stripping

</tbody>
</table>

Construction
Tube: Black static-dissipative PTFE
Reinforcement: 304 Stainless Steel braid

Operating Parameters
Temperature Range:
-65°F to +400°F (-54°C to +204°C)
Change in length at Max. Working Pressure: ±2%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)

Fittings
94 Series – pg. E-90

Notes
Factory-made assemblies only
Not suggested for steam-cold water cycling applications
944B – 4,000-4,500 psi W.P. High Temp Hose

Features
- High temperature hydraulic hose
- Excellent chemical compatibility
- Resists moisture
- Low friction minimizes pressure drops and deposits

Applications/Markets
- General Hydraulics
- Chemical Transfer
- Compressed Air/Gases

See pg. A-20 for part numbering system
STW/STB - “TRUE BORE” Smoothbore PTFE Hose, Stainless Steel Braid

Features
- High temperature hose
- Excellent chemical compatibility
- Resists moisture
- Low friction minimizes pressure drops and deposits

Compliances
- FDA 21 CFR 177.1550
- USP Class VI
- ISO 10993 Sections 5, 6, 10, 11

Applications/Markets
- Fluid Handling
- Chemical Transfer
- Paint
- Pharmaceutical
- Food & Beverage
- Cosmetics

Construction
Tube: STW - Natural FDA Compliant PTFE
STB - Black Static-Dissipative PTFE
Reinforcement: 304 Stainless Steel braid

Operating Parameters
Temperature Range: -100°F to +450°F (-73°C to +232°C)
Change in length at Max. Working Pressure: +2% to -4%
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)
All ratings based on 72°F/23°C

Fittings
PAGE Fittings – pg. E-91
Uses crimp collar ST300, see pg. E-92
For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

Notes
“Z” indicates double braid
See pg. A-21 for part numbering system
Cannot be used with 90 or 91N series fittings

SBFW/SBFB - PAGE-flex® SBF
Extra Flexible Fluoropolymer Hose

Features
• Half the minimum bend radius of conventional smoothbore products
• Kink and vacuum resistant
• Easily cleaned
• PPIH full line of optional reinforcement types
• Cooler outside temperatures reduces operator burns
• Reduces environment temperatures in confined areas
• Available with white Silicone cover

Compliances
• FDA 21 CFR 177.1550
• USP Class VI Certified
• ISO 10993 Sections 5, 6, 10, 11

Applications/Markets
• Fluid Handling
• Chemical Transfer

Fittings
PAGE Fittings – pg. E-91
Complete line of standard PPIH crimp fittings

Notes
Factory-made assemblies only
SBFB - Special order only
Available with white Silicone cover
See pg. A-21 for part numbering system
**SCW/SCB - Convoluted PTFE Hose**

**316 Stainless Steel Braid**

**Features**
- High temperature hose
- Excellent corrosion resistance
- Seamless
- Open pitch
- Self draining
- Withstands extreme flexing
- Environmentally safe; low effusion
- Long life expectancy

**Applications/Markets**
- Fluid Handling
- Chemical Transfer
- Paint
- Semiconductor

**Compliersances**
- FDA 21 CFR 177.1550
- USP Class VI
- ISO 10993 Sections 5, 6, 10, 11

### Construction
- Tube: SCW - Natural FDA Compliant PTFE
- SCB - Black Static-Dissipative PTFE
- Reinforcement: 316 Stainless Steel braid

### Operating Parameters
- Temperature Range: -100°F to +500°F (-73°C to +260°C)
- Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)
- All ratings based on 72°F/23°C

### Notes
- Not suggested for steam-cold water cycling applications
- See pg. A-21 for part numbering system
- Cannot be used with 90 or 91N series fittings

Construction
Tube: PCW - Natural FDA Compliant PTFE
PCB - Black Static-Dissipative PTFE
Reinforcement: Polypropylene

Operating Parameters
Temperature Range:
0°F to +212°F (-18°C to +100°C)
Min. Burst Pressure is 4x Max. Working Pressure at 73°F (23°C)
All ratings based on 72°F/23°C

Fittings
PAGE Fittings – pg. E-91
Uses crimp collar PC300, see pg. E-92
For most Parker products, Crimp Die Selection charts can be found online at www.parker.com/crimpsource
Access instructions are on pg. G-13

Notes
Not suggested for steam-cold water cycling applications
See pg. A-21 for part numbering system
Cannot be used with 90 or 91N series fittings

For detailed ordering information, please consult price list or contact Parflex® Division.
